DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following invention is required under 35 U.S.C 121:

A. Claims 1-9, 11-19, and 21-29 are drawn to a method for real-time measurement of the performance of communications on a large area network between a selected server and a plurality of users, classified in class 709, subclass 224.

B. Claims 10, 20, and 30 are drawn to a method for comparing an address field of a large area network record to a database, classified in class 707, subclass 6 and 102.

- 2. Inventions A and B are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention A has separate utility such as a method for real-time measurement of the performance of communications on a large area network between a selected server and a plurality of users, classified in a different Class/Subclass. Invention B has separate utility such as a method for comparing an address field of a large area network record to a database, classified in a different Class/Subclass. See MPEP 806.05(d).
- 3. The inventions are distinct, each from the other because of the following reasons:
- (a) these inventions have acquired a separate status in the art as shown by their difference classifications.

Art Unit: 2143

ì

(b) the search required for each Group is different and not co-extensive for examination purposes.

For example, the searches for the two inventions would not be the co-extensive because these Groups would require different searches on PTO's classification class and subclass as following:

The Group A search (claims 1-9, 11-19, and 21-29) would require use of search class 709, subclass 224 (not required for the invention B).

The Group B search (claims 10, 20, and 30) would require use of search class 707, subclass 6 and 102 (not required for the inventions A).

For the reasons above restriction for examination purposes as indicated is proper.

- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
- 5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17 (h).

Application/Control Number: 09/471,964

Page 4

6. A telephone call was made to attorney Scott C. Harris, on 10/28/02 and again on 11/1/02 to request an oral election to the above restriction requirement, but no agreement was made because the Examiner was unable to reach the attorney.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alina N Boutah whose telephone number is (703) 305-5104. The examiner can normally be reached on Monday-Friday (8:30 am-5:30 pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A Wiley can be reached on (703) 308-5221. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 746-9112 for regular communications and (703) 305-3718 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
